ABHYUDAY SINGH

San Antonio, TX | (210) 639-2471 | sabhyuday14@gmail.com
linkedin.com/in/abhyudaysingh7 | github.com/guyWhoWantsToCode

EDUCATION

The University of Texas at San Antonio (UTSA) | San Antonio, TX
B.S. in Computer Science | Expected May 2029 | GPA: 3.43/4.00
Coursework: Data Structures, Object-Oriented Programming, Discrete Mathematics, Linear Algebra, C Programming

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C, SQL
Frameworks & Web: React, Next.js, FastAPI, HTML, CSS, Tailwind CSS, REST APIs, WebSockets
Data & Tools: PostgreSQL, Supabase, Git, GitHub, pytest, OpenAI API, Gemini API, Streamlit

SELECTED PROJECTS

StarFlow — Multi-Agent AI Request Scheduler · GitHub

Python · FastAPI · asyncio · PostgreSQL · WebSockets · Gemini API

- Independently developed the backend scheduler for multiple AI agents sharing a 10-request/second budget; guaranteed per-agent capacity and redistributed unused requests to busy queues.
- Implemented 20-request bounded queues, Gemini API dispatch, live WebSocket status updates, and PostgreSQL metrics consumed by a team-built React dashboard.

F1 Telemetry Coach — Real-Time Lap Analysis · GitHub

Python · FastAPI · React · TypeScript · UDP · pytest

- Developed an end-to-end telemetry application that reads UDP race data, records laps, and aligns reference and comparison runs by track distance.
- Built corner-event analysis for braking, throttle pickup, speed minima, and time gained or lost; added REST endpoints, a React dashboard, and automated tests for core processing.

AI Resume Reviewer — Full-Stack AI Application · GitHub

Next.js · TypeScript · Supabase · OpenAI API · Zod

- Developed authenticated PDF/DOCX resume upload and text extraction with AI-generated feedback via the OpenAI API.
- Validated structured AI output with Zod and implemented Supabase-backed user and file workflows.

Pathfinder — Graph Search Visualizer · GitHub

JavaScript · HTML/CSS · Algorithms

- Visualized BFS, DFS, Dijkstra, A*, and greedy best-first search with side-by-side algorithm comparison and procedurally generated mazes.

EXPERIENCE

Volunteer Hour Coordinator — Hope for Triumph (Nonprofit) | Aug 2022 – Sep 2025

- Maintained and validated volunteer-hour records for 50+ participants, using organized tracking systems to improve consistency of reporting.
- Prepared activity summaries for nonprofit staff and coordinated accurate reporting under deadlines.

ACTIVITIES & AWARDS

Hackathons: RowdyHacks and CodeRED; collaborated on time-constrained project builds.
President's Volunteer Service Award: Silver (250+ hours), Bronze (100+ hours).
DECA: Qualified for state competition in Automotive Marketing.
